Charles W. Bailey, Jr.

HOUSTON: DIGITAL SCHOLARSHIP

3/18/2013

## Introduction

In a rapidly changing technological environment, the difficult task of ensuring long-term access to digital information is increasingly important. The *Digital Curation Bibliography: Preservation and Stewardship of Scholarly Works, 2012 Supplement* presents over 130 English-language articles, books, and technical reports published in 2012 that are useful in understanding digital curation and preservation. This selective bibliography covers digital curation and preservation copyright issues, digital formats (e.g., media, e-journals, and research data), metadata, models and policies, national and international efforts, projects and institutional implementations, research studies, services, strategies, and digital repository concerns.

It is a supplement to the *Digital Curation Bibliography: Preservation and Stewardship of Scholarly Works*, which covers over 650 works published from 2000 through 2011. All included works are in English. The bibliography does not cover conference papers, digital media works (such as MP3 files), editorials, e-mail messages, letters to the editor, presentation slides or transcripts, unpublished e-prints, or weblog postings.

The bibliography includes links to freely available versions of included works. If such versions are unavailable, italicized links to the publishers' descriptions are provided.

Links, even to publisher versions and versions in disciplinary archives and institutional repositories, are subject to change. URLs may alter without warning (or automatic forwarding) or they may disappear altogether. Inclusion of links to works on authors' personal websites is highly selective. Note that e-prints and published articles may not be identical.

The bibliography is available under a [Creative Commons Attribution-NonCommercial 3.0 Unported License](#).
